Geumsan Ginseng Cooperative

**Ginseng Capital of the World, GeumSan
Roots of Life! Geumsan ginseng**

About Us

The Geumsan Ginseng Cooperative consists of health food supplements-related farms, plants and companies that have their own manufacturing facilities, and operate the business of selling them in Geumsan-gun, Chungcheongnam-do, the Republic of Korea.

With the one-stop system from cultivation to processing and distribution, it manufactures the best health food supplements in the Republic of Korea.

In addition, we are developing competitive products by improving quality and securing stability based on technical alliance with the Geumsan Ginseng & Herb Development Agency and R&D, and is researching continuously to make better products through the competitive show with the consumer panel.

To this, we have obtained various certificates from governmental agencies in addition to the acquisition of various certifications, being recognized for the excellence of our products in the global market.

The Geumsan Ginseng Cooperative has achieved more than USD 4 million in exports to the global markets in 15 countries, including the United States, Canada, Australia, Austria, Germany, United Kingdom, France, Czech Republic, Poland, Romania, China, Japan, Taiwan, Vietnam, and Myanmar, beyond Korea, spreading all over the world.

Geumsan Ginseng Cooperative will create the joy of working together.

Certification mark and certificate

Health functional food

It refers to a food manufactured using functional ingredients that are nutritious and helpful for our body. It is a product made with ingredients recognized as functional ingredients by evaluating scientific evidence such as animal testing and human body application testing by the Ministry of Food and Drug Safety.

GMP

It refers to the practice for manufacturing and managing excellent foods and medicine as the basic condition for guaranteeing the stability and effectiveness of food and medicine in terms of quality. If the suitability is confirmed by on-site investigation, etc., it shall be designated as a GMP-applied business.

HACCP

It is a scientific hygiene management system to secure food safety by managing risk factors that may occur at each stage from raw materials of food through the steps of manufacturing, processing, preservation, distribution, and cooking before consumption by end consumers.

GAP

This is a system implemented for systematic management and stability certification of excellent agricultural products. It is an international specification system implemented to build a safety management system of agricultural products from production to selling and supply safe agricultural products to consumers.

PGI

When the reputation and quality of a specific agricultural product or processed product is essentially attributable to the geographical characteristics of a specific region, it is an indication that the agricultural product or processed product was produced or processed in that region.

Pesticide-free

It is a certification system granted to agricultural products produced by minimizing the use of chemical fertilizers to less than 1/3 of the recommended fertilization amount without using any organic synthetic pesticides.

<Geumhong >, Co-brand for Geumsan Ginseng Herb

It is a brand approved by the Governor of Geumsan for the use of the products that have passed the strict facility standards and the quality management regulations among processed ginseng products produced in Geumsan-gun, Chungcheongnam-do, South Korea as the birthplace of Korean ginseng.

G-Mark

It is a product with high quality certified by the Governor of Geumsan among the products manufactured as food and reported as processed products in Geumsan-gun. It is a certification mark indicating that products are produced in Geumsan and domestic ginseng is used as raw material, and that the products are stable and manufactured at excellent facilities.

ISO 9001

As an international standard for the quality management system of the International Organization for Standardization (ISO), it is a system to secure food safety by managing harmful factors that may occur from raw materials to manufacturing, processing, and distribution of products.

ISO 22000

It is an international standard that incorporates and complements the key elements of ISO 9001 and HACCP. The core elements of ISO 22000 stipulate mutual communication, system management, prerequisite programs (PRPs), and the principles of HACCP.

FSSC 22000

It is a food safety certification system developed with a focus on food manufacturers. It is a system made by the GFSI for establishing the standards widely adopted to define the food safety certification system appropriate for the whole food industry.

FDA

It is in charge of controlling, managing, and approving all kinds of items produced, distributed, and sold in the United States under the detailed regulations of the U.S. FDA. It is recognized for its credibility because it makes strict and careful marketing approval decisions around the world.

www.gincoop.com

The Geumsan Ginseng Cooperative creates the joy of being together.

FRESH GINSENG

01 Raw Ginseng

Net Weight	100g ~ 1kg
Ingredients and Contents	100% 4-6 year-old Korean ginseng
Suggested Use	Be sure to wash before consuming. Spring ginseng may sprout but sprouts are harmless to the human body. If you steam and dry washed ginseng, it becomes red ginseng. If you dry it as is, it becomes white ginseng. If you store it after drying, you can consume it longer with benefits. If you are eating raw ginseng, remove the ginseng head.

02 Fresh Ginseng Gift Set

Net Weight	750g ~ 3kg
Ingredients and Contents	100% 4-6 year-old Korean ginseng
Suggested Use	Dry pieces of fresh ginseng stems or foreign substances may have been produced during washing. Wash once more, and use a suitable amount as food ingredient.

03 Washed Fresh Ginseng (regular)

Net Weight	100g ~ 1kg
Ingredients and Contents	100% 4-6 year-old Korean ginseng
Suggested Use	Dry pieces of fresh ginseng stems or foreign substances may have been produced during washing. Wash once more, and use a suitable amount as food ingredient.

04 Washed Fresh Ginseng (vacuum packaging)

Net Weight	100g ~ 1kg
Ingredients and Contents	100% 4-6 year-old Korean ginseng
Suggested Use	Dry pieces of fresh ginseng stems or foreign substances may have been produced during washing. Wash once more, and use a suitable amount as food ingredient.

금산 인삼약초 공동브랜드
KOREAN GEUMSAN GINSENG
GEUMHONG

A photograph of Geumsan ginseng plants. The image shows several clusters of bright red, spherical berries, each composed of many small, round fruits. These berries are attached to thin, dark stems. The plants have lush green, serrated leaves. The background is a soft, out-of-focus brown, suggesting a natural growing environment. The text "Healthy energy that contains nature, Geumsan ginseng" is overlaid in white at the bottom of the image.

**Healthy energy that contains nature,
Geumsan ginseng**

함께하는 기쁨
금산진생 협동조합이 만들어갑니다.

The Geumsan Ginseng Cooperative creates the joy of being together.
